

# CITY OF LODI

## COUNCIL COMMUNICATION

AGENDA TITLE: Plans and Specifications and Advertisement for Bids for White Slough Water Pollution Control Facility Chain Link Fence

MEETING DATE: December 6, 1995

PREPARED BY: Public Works Director

RECOMMENDED ACTION: That the City Council approve the plans and specifications for the above project and authorize advertising for bids.

BACKGROUND INFORMATION: This project will provide a fence around the treatment plant facilities and ponds as a means of security for the City's operation. No security fencing currently exists around the treatment plant. The treatment plant administration building has experienced vandalism and burglaries in the past and this fence will completely enclose the City operation. The fence will not enclose either the NCPA project or the County mosquito abatement ponds and it will not interfere with the farming of the City's leased lands.

After the fence is installed, the Public Works Department plans to install an infrared alarm system to provide additional security and give the County Sheriff's Department more response time before intruders can break into any buildings. The infrared alarm system is not included as part of this project and will be brought back to Council at a later date.

The money for this project will be coming from the Wastewater Capital Outlay Reserve Fund. A request for appropriation of funds will be made at contract award. Construction is anticipated to begin in the spring of 1996.

FUNDING: Originally Budgeted: 1994/95  
Budgeted Fund: Wastewater Capital Outlay Reserve Fund  
Total Project Estimate: \$68,000  
Planned Bid Opening Date: January 17, 1996

  
Jack L. Ronsko  
Public Works Director
